Panasonic mempersembahkan teknologi unik nanoe™

Teknologi nanoe™ dari Panasonic membuat ruangan Anda menjadi segar dan bersih. nanoe™ mengandung uap air sekitar 1.000 kali lebih dari ion negatif yang mampu menghambat pertumbuhan bakteri, virus dan jamur.

nanoe™

Perangkat nanoe™ tidak perlu penggantian berkala

Perangkat nanoe™ dapat melepaskan radikal dalam air molekul yang meningkatkan efektivitas membunuh bakteri dan bau. Karena nanoe™ dihasilkan dari kelembaban di udara, dan tidak membutuhkan perangkat. Dengan demikian, penggantian berkala perangkat tidak diperlukan.

Apa itu nanoe™?

nano-technology + electric =

nanoe™ terbungkus dalam molekul air

Nanoe™ adalah partikel air halus (5 hingga 20 nm) dan asam lemah dengan zat reaktif dan muatan listrik.

Radikal OH memiliki karakteristik menghilangkan hidrogen dari virus, bakteri, bau dan alergen. Oleh karena itu, semakin banyak radikal OH, semakin tinggi efektivitas kekuatan anti-virus.

nanoe™ X dan nanoe™ terbukti efektif menghilangkan bau, menonaktifkan virus, bakteri, jamur dan alergen

Cara Nanoe™ X me-nonaktifkan Virus

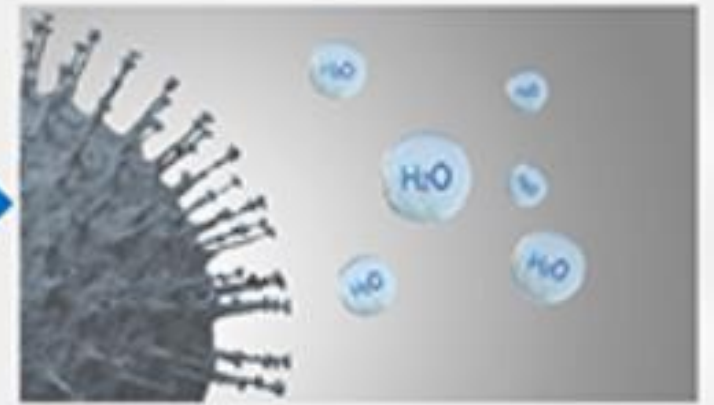

Virus

nanoe™ X secara andal meraih virus-virus

OH-radikal mengubah protein virus

Aktivitas virus dihilangkan^{*)}

Hasil Test Texcell Nanoe™ X VS Virus Corona

Panasonic

Test Report

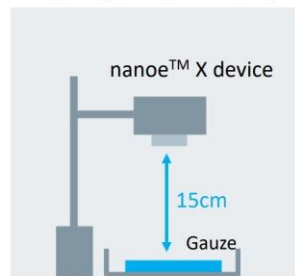

nanoe™ X inhibits activity of adhered novel coronavirus (SARS-CoV-2) over 99.99% in 2 hours.

Test outline

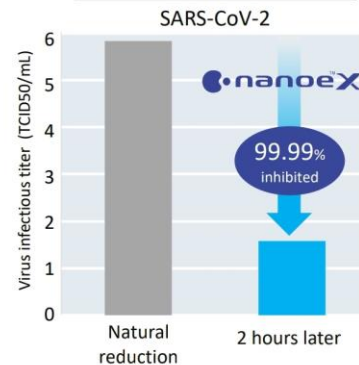

- (1) Testing organisation: Texcell (France)
- (2) Test subject: Adhered novel coronavirus (SARS-CoV-2)
- (3) Test volume: 45L enclosed box (400mm × 350mm × 350mm)
- (4) Test result: Virus activity inhibited over 99.99% in 2 hours
- (5) Report No.: 1140-01 A1

Test ambient

45L BOX (350×350×400mm)

Cover page

The cover page features the Texcell logo at the top. Below it, the title reads 'CERTIFICATE OF INVESTIGATION STUDY' followed by 'STUDY OF VALIDATION OF THE EFFICIENCY OF nanoeX ON SARS-COV2 BY NO GLP VIRAL CLEARANCE STUDY (FIO)'. The study number is 1140-01 A1. The sponsor is PANASONIC CORPORATION APPLIANCES COMPANY, located at 2-3-1-2 Noji-higashi, Kusatsu City, Shiga 525-8555, Japan. The test facility is TEXCELL, managed by Boisson Bruno. A signature is present, along with the address: Genavenir 5, 1 rue Pierre Fontaine, 91058 Evry cedex, France. A blue box highlights the key finding: 'In Panasonic conditions of use: An inactivation and reduction titer of 4.37 (99.995%) Log of Sars-Cov-2 in 2 hours was demonstrated in a 45 L. Box'. Contact information for Texcell is provided at the bottom, including the address, phone, and website. The version is noted as FINAL.

Project name : Hiroshima Washington Hotel
Project type : Hotel
No. of Air-e installed : 266 sets
Installation period : 2013 OCT

User comment :
Introduced "air-e" in all guest rooms!
Evaluate the deodorizing effect

"air-e" was installed in all guest rooms. Opened in 2013 as a new model hotel. When I entered the room to check the cleaning status, I was surprised at the deodorizing effect.

We receive less complaints about the odor than before. Maintenance staff replacement is not necessary, we are satisfied with the saving as well.
